MEDIA RELEASE

JobsDB.com launches the revolutionary RMS Dashboard
Split-screen display greatly enhances hiring efficiency

[29 July 2010 – Hong Kong] JobsDB.com, the leading online recruitment network in Asia Pacific and the most used recruitment media in Hong Kong, continues to launch cutting-edge features to deliver an extraordinary experience for users. Only one month ago, it released the first ever Dynamic Job Search on Map, making job hunting a breeze for job seekers. The latest release promises to bring even more excitement to employers using JobsDB.com.

The RMS Dashboard in the upgraded Recruitment Management System (RMS) contains a whole host of technically advanced features, enabling recruiters to perform multiple tasks on a split-screen without annoying page changes. These include instant display of up to 100 resumes, auto-opened attachments without the need for downloading, import resumes, a private applicant database, customizable folders and other new features, allowing a more comprehensive and quicker review of applicants and jobs.

Mr. Vincent Koo, Executive Director of JobsDB.com, said, "We believe in constantly innovating to improve the user experience of recruiters and job seekers. In light of the vibrant employment scene, the new RMS Dashboard will allow employers to manage the increasing number of applicants in a more effective manner."

The upgraded RMS will include the following new features:

Viewing of multiple resumes without page change
The new split-screen multi-resume display, similar to that used by job seekers for jobs, offers up to 100 resumes to be viewed instantly without switching pages.

Auto-opened Attachments
Resume attachments are opened automatically in a preview pane on the same page, enabling employers to view applicants faster and more effectively (without spending time for downloading). Different document formats are supported by this new feature.

Import Resumes in Multiple Formats
Employers can import resumes in a variety of document formats, including image and text files such as .pdf and .ppt. This allows consolidation of applicants from different channels into a single system for processing.

Private Applicant Database
Employers can save all the resumes of applicants to form their own applicant database, and they can search for suitable talent at any time.

Customizable Folders
 Different jobs and applicants can be allocated to customised folders. Favourite folders can also be assigned for faster viewing of information.

– End –

Online Demonstration of New Features
